

Advanced Training for Management Reporter

Please join us for the Advanced level of training on Management Reporter, the newest reporting tool from Microsoft. With Management Reporter for Microsoft Dynamics ERP you can create boardroom quality reports without IT assistance and take advantage of secure report distribution and storage through the centralized Report Library. The Advanced program will take you beyond the basics of the introductory training offered earlier this year.

Management Reporter integrates directly with your primary data source - the General Ledger in Dynamics GP. It also offers flexible page design and the ability to add company logos.

Here are the course highlights:

- Advanced Formatting Options
- Conditional Statements
- Linking to External Worksheets
- Multi-Company Consolidations
- Report Output and Distribution
- Security
- Maintaining Management Reporter
