Cost: Free

CPE credit available on request

[Click here to register](#)

Please join Altico Advisors and Ei Dynamics for a Webinar on how to **reduce manual processing and enhance internal controls across your organization.**

Ei Dynamics is a business activity monitoring (BAM) application priced for the mid-market that augments the capabilities of Microsoft Dynamics GP. With this software you can monitor virtually all Dynamics GP data, send business alerts (**via email, fax, ftp, printer, text message, Web and Twitter**), automatically schedule, generate, and distribute industry standard reports (Crystal and SSRS) as well as develop sophisticated workflows and portals.

Join us on February 22nd to learn about the 3 major components of Ei Dynamics:

- 1) Dynamic Alerts**
- 2) Dynamic Reports**
- 3) Dynamic BPM (Business Process Management)**

Customer Success Story – Altico and Ei Dynamics:

“Our client was looking for a way to email Purchase Orders to their vendors. Using Ei Dynamics, not only were they able to email the purchase orders, they were also able to attach a .pdf of the Item Schematic to the email. What’s more, a schematic was attached for every item on the purchase order. And last but not least, they were able to set up batch email invoices and orders.”

Register now to attend online from the comfort of your home or office.
