

Introduction to Management Reporter

Please join us for an introduction to Management Reporter, the newest reporting tool from Microsoft. With Management Reporter for Microsoft Dynamics ERP you can create boardroom quality reports without IT assistance and take advantage of secure report distribution and storage through the centralized Report Library.

Management Reporter integrates directly with your primary data source - the General Ledger in Dynamics GP. It also offers flexible page design and the ability to add company logos.

Here are the course highlights:

- Navigation
- Report Formatting Options
- Creating Folders in the Report Library
- Reporting Trees
- Exporting and Importing Between Building Block Groups
- Side by Side Reporting
- Relational and Variance Reporting
- Migrating from FRx to Management Reporter
- Differences between FRx and Management Reporter
