

Jet Enterprise: Business Intelligence Simplified from Jet Reports

Jet Enterprise is a unique system that offers full reporting as well as business intelligence based on a single version of the truth. It is a revolutionary self-service Business Intelligence solution designed for Microsoft Dynamics ERP, giving you BI and reporting in one scalable, low cost solution. With Jet Enterprise your entire organization gains access to accurate, up-to-date information in Excel—the format they already understand for both BI and reporting.

Jet Reports developed Jet Enterprise to simplify BI and give you the signature power of Jet Reports Essentials— all designed for the BI world:

- **Little or No Training Required.** The intuitive drag-and-drop interface inside Excel allows you to visually manipulate data to see the information as you desire.
- **Immediate Return on Investment.** Implement in hours and gain valuable insight into your business from day one.
- **Business Intelligence and Reporting in One Solution.**
- **Warehouse and Data Cubes** - optimized for Dynamics ERP

Jet Reports delivers a complete reporting to business intelligence suite of products for the Microsoft Dynamics Community integrated with Excel. The front end for our products is all Excel—so if you know Excel, you'll love Jet Reports. There's no time-intensive learning curve, no running to IT to program your report, no cutting and pasting—just easy, impactful business reporting and analysis you create right in Excel and connected to your Dynamics ERP system.

Our suite of products has been the most widely-used reporting solution for Microsoft Dynamics for more than a decade, with over 55,000 users.
