SmartList and SmartList Builder Boot Camp

If you missed this class in 2011, you need not wait until next November to catch up, because … due to popular demand, we are offering the same material **online** in January 2012. Please join us for a deep dive into three great tools - SmartLists, SmartList Builder, and Excel Builder.

SmartList and SmartList Favorites, for example, are used to track and analyze the information you need to run your businesses better. A widely used query tool for locating critical business information, SmartList now offers more than 100 pre-defined queries that can be easily modified and exported to Excel or Word for further analysis or to share with others.

SmartList Builder allows you to go beyond the pre-defined queries by creating your own. Building your own SmartList objects means that there is no data within your Dynamics GP database that you can't access and analyze via a SmartList.

Here are the course highlights:

- Creating SmartList views
- Using SmartList Favorites to track business critical information
- Searches, filters, selection criteria
- Adding and removing data, real time data manipulation
- Building your own SmartLists
    - A step-by-step "how to"

Where: Online (login instructions to follow)
Date: Thursday, January 19
Registration Deadline: January 5*
Time: 8:30am to 12:30pm EST
Cost: $300 ($250 for additional participants from the same company)
